

PROTECTING YOUR PATIENTS STAFF AND CRITICAL ASSETS WITH AI-POWERED VIDEO ANALYTICS

EMPOWER YOUR EXISTING SECURITY INFRASTRUCTURE WITH AI-POWERED VIDEO ANALYTICS THAT HELP YOU BETTER ENHANCE SECURITY, SAFETY, AND BUSINESS OPERATIONS AROUND YOUR HEALTHCARE CAMPUS.

MINIMIZE WORKPLACE VIOLENCE

SCENARIO

Providing a safe and secure environment for the patients, staff, and visitors.

SOLUTION

Use our solution to search real-time or pre-recorded video on your fixed or mobile camera. Quickly locate a particular person of interest (POI), determine their path throughout the facility and pinpoint their current location.

Stats: Of approximately **25,000** violent events that occur each year in all workplace environments, almost **75%** are in the healthcare setting.

PATIENT SAFETY AND STAFF RETENTION

SCENARIO

Healthcare facilities need to be accessible to the public but not feel like high security facilities. This creates a myriad of security challenges and presents opportunities for bad actors to harm staff and patients.

SOLUTION: Use our technology to help you mitigate unsafe incidents. Send support based on triggered alerts, use Re-ID to help you address bad actors before they enter your facility, or have the ability to provide a virtual escort for staff after hours.

Stats: **21 percent** of registered nurses and nursing students reported being physically assaulted—and **50 percent** verbally abused—in a 12-month period (OH&S, 2020).

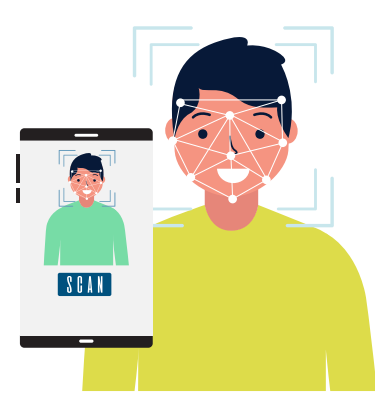

CRITICAL AREA PROTECTION

Stocked with many valuable and life-saving drugs with high street values, pharmacies and their inventory can be a target of theft and manipulation. Use our solution to continuously monitor restricted areas through smart zoning and person detection. Create alerts, notify staff, and deploy a force multiplier when it comes to critical area protection.

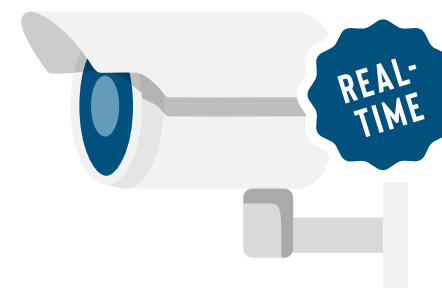

Stats: The Drug Enforcement Administration investigated roughly **3,600** cases of alleged drug theft at healthcare facilities over the last five years.

THE BENEFITS OF USING VINTRA

STREAMLINE INVESTIGATIONS

Stop searching and start solving. Conduct fast and accurate video searches up to 10x faster than manual video review from all your existing cameras. Share the results with colleagues and law enforcement and create smart rules to prevent the incident from happening again.

PERSON-DOWN

Detect a person collapsing on the floor within the field of view of the camera and ensure that they are given timely and rapid care as needed.

COMPLIANCE WITH REGULATIONS

As healthcare facilities continue to experience high hospitalization rates, it's critical to implement proactive safety action plans for 2022 and beyond. Learn how Vintra's AI-powered video analytics tools can help you comply with the latest health workplace violence prevention standards from the Joint Commission.

CUSTOMER EXPERIENCE

Your cameras are not just for security purposes. They can also deliver valuable and actionable insights, in the moment and over time, on events that impact patient experience at your facility. Person counting, queue monitoring, and traffic pattern insights are all enabled by Vintra's solution.

Stats: A **5%** growth in customer retention rates, increases profits anywhere from **25%-95%**. Did you know that **84%** of people believe wait time is one of the most important factors in an overall experience in a healthcare setting?
